

ProMAX Systems Debuts Affordable Video Storage Solutions Aimed At Video Professionals

Irvine, California (May 21, 2009) - ProMAX Systems, the maker and integrator of video editing solutions for professionals in the video industry, today announced the availability of their new SataMAX and FireMAX video storage solutions aimed at giving video professionals a high quality, ultra fast, flexible and affordably priced storage.

The New SataMAX and FireMAX are a re-birth of the storage solutions ProMAX offered in the past. With these new versions, ProMAX improved their reliability and performance capabilities to take on the challenges of today's HD and beyond video editing needs.

"We know that there are plenty of storage solutions out in the market for general purpose editing, photography storage, etc." stated Rob Brambila, Technical Director of ProMAX Systems, "However, with SataMAX and FireMAX, we focused all of our resources and know how to put together a great storage solution focused specifically on professional video editors."

The new storage solutions range from 500MB all the way up to 4 Terabytes and can be configured in a variety of RAID protection formats or as standalone drives. The drives come in single, 2 bay and 4 bay configurations where you can easily swap out drives as they get full and replace them with fresh ones (this is great for project swapping). With connection options ranging from USB 2.0 to Firewire 400/800 to eSATA, you have the full range of options to make these solutions work both on a desktop and/or a laptop.

For an additional \$25 per one terabyte of storage, you can add the ProMAX "Peace of Mind" Storage Protection Plan, which includes an advanced drive replacement (we ship to you before we get yours back), a data recovery service and a comprehensive 3-Years parts and labor warranty (there are some limitations to this plan, so please check our site for more information).

"We know how critical it is for a video editor to have their storage solution up and running all the time, specially while working on a critical project." stated Jess Hartmann, CEO of ProMAX Systems, "That's why we are offering the ProMAX Peace Of Mind Protection to make sure you stay up and running constantly and finish your project on time."
